

Gantt Chart for Project Timeline: Communication and Leadership Implementation Plan

Author: Abraar Uddin

Date: 8th June 2025

Course: Information Technology Field Experience-EX20

This Gantt chart visualizes the phases of a structured communication and leadership development project over a 12-week period. It incorporates milestones and subtasks based on best practices in project planning and agile delivery.

Real-world examples and project modelling techniques are inspired by industry standards from Microsoft Project and Atlassian's agile project tracking tools. The chart also adheres to the guidelines outlined by the Project Management Institute (PMI), which emphasizes the use of Gantt charts as part of effective schedule management.
